Professional Summary

Final-year Deakin Cyber Security student (Network Security minor) with hands-on academic and lab experience in SOC triage, network/digital forensics, malware analysis and Python security tools. Built and evaluated anomaly-detection and prompt-injection detection systems. Seeking cybersecurity internships and entry-level SOC/DFIR roles.

Technical Skills

Network / DFIR	Wireshark, tcpdump, Nmap, PCAPs, Volatility 3, Autopsy, FTK Imager, evidence hashing
SOC / Malware	Wazuh, ELK, Splunk (labs), Sysmon, Windows logs, Procmon, PE analysis, MITRE ATT&CK
Python / AI	Python, Bash/PowerShell fundamentals, scikit-learn, PyTorch, SHAP, FastAPI, SQL/SQLite
Cloud / Systems	AWS (VPC, EC2, IAM, S3, RDS labs), Linux, Windows, Docker, Git

Selected Technical Projects

F.E.A.R. — Network Anomaly Detection [GitHub] Python, PyTorch, scikit-learn, SHAP

- Compared Isolation Forest, One-Class SVM and autoencoder models; achieved 92.3% recall for DoS Hulk and 84.5% for DDoS with the autoencoder.
- Tested cross-dataset generalisation, adversarial robustness and explainability; identified weak brute-force detection.

LLM Prompt Injection Detector [GitHub] Python, FastAPI, scikit-learn, SQLite

- Developed hybrid rules/ML detection with a scanning API and logged results; achieved 79.4% held-out accuracy after addressing dataset bias.

Network Forensics and SOC Investigation Labs Wireshark, tcpdump, Wazuh/ELK, Sysmon

- Analysed packet captures, authentication alerts and host logs; correlated timelines, assessed indicators and documented evidence versus hypotheses.

Malware Analysis and Digital Forensics Labs Volatility 3, Autopsy, Procmon, PE tools

- Investigated executable imports, packers, persistence and process behaviour in isolated VMs; examined memory artefacts and evidence integrity.

Experience

Social Media Designer & CTF Mentor 2024–2025

Deakin University Cybersecurity Association

Mentored students in CTF challenges (web security and forensics) and developed cybersecurity education content.

Hospitality Manager 2019–2026

Cafe Savvy

Led and trained teams of up to 10, prioritised work under pressure and coordinated service operations.

Education & Training

Bachelor of Cyber Security (Network Security minor) 2023–Present

Deakin University | WAM: 79.28 (Distinction average) | Network forensics, malware analysis, ethical hacking, cryptography.

TryHackMe: SOC Level 1 completed; Top 1% globally; 720+ day streak.
